

Novosoft Handy Backup Standard

The power of simplicity

Handy Backup Standard is a reliable backup solution for home computers and small office networks. It provides an easy way to protect data on a computer working under Windows 7/Vista/XP/2000 or 2008/2003 Server operating systems.

Handy Backup Standard is an award-winning utility designed specifically for users who are not highly experienced in administering computers. If you need an easy-to-use software that can automatically create backups of your memorable pictures, e-mails, documents and other valuable information, then Handy Backup is right for you!

Unlike other backup software out there, Handy Backup doesn't treat your data like faceless chunks of memory. It features a variety of add-ons that allow backing up settings of all applications that you've tweaked to perfection - so in case of an error you can restore all skins, playlists, preferences and configurations just the way you liked them!

And what makes it even more advantageous is that all users of Handy Backup are entitled to free unlimited support by phone, Skype or e-mail!

- More than 40,000 users worldwide
- 40 countries
- 23 interface languages
